

E-Papillon

Electronics and assimilation lighting are subjects that have been discussed for a long time. So now there's a perfect solution. Papillon fittings with reliable Greenvision electronics from Philips: the E-Papillon.

The E-Papillon has many advantages compared with conventional fittings. Basically it comes down to the fact that with less energy, more growth light can be made. Namely, the E-Papillon causes an energy saving of about 5%, so a substantial saving on your energy costs. Also, more light comes out of the specially developed lamps. Together with a reflector yield of 92%, this means that the E-Papillon is the most energy-saving fitting that is available at the moment. Of course the reflector part can be slid easily into the housing as well; so the annual cleaning of the reflectors is a straightforward business. Since the reflectors are unchanged compared with the conventional fittings the guarantee remains that there will be a maximum permanent decay of the reflector of 10% over the 10-year life.

The E-Papillon is available in 2 different versions: the E-Papillon 600W and the E-Papillon 1000W. The fitting is guaranteed for 2 years. You will also get all the other guarantees, so that you can always be sure of the highest light output. Do you need a lighting installation that will give you even more growth light at even lower costs? Please ask for an obligation-free quote.

Technical specifications

	E-Papillon 600W	E-Papillon 1000W
Voltage	400V (-8%...+6%)	400V (-8%...+6%)
Frequency	47.5Hz...63Hz	47.5Hz...63Hz
Current consumption	1.7A	2.7A
Rated power	635W	1035W
Tolerances	± 3%	± 3%
Weight	± 3.5kg	± 3.5kg
Cos φ	>> 0.97	>> 0.97
